Software Engineer with 5+ years of experience developing web and mobile applications using technologies such as Angular, React, Flutter, Node.js, and .NET. Experienced in designing and implementing scalable solutions, APIs, and microservices while contributing to all stages of the software development lifecycle, from feature analysis and planning to implementation and maintenance. Passionate about continuous learning, software quality, and leveraging modern technologies to build efficient, reliable, and maintainable systems.

PROFESSIONAL EXPERIENCE

FortyAU **Remote**
Senior Software Engineer *February 2025–Present*

- Contribute to all stages of the software development lifecycle, including ticket refinement, feature analysis, task planning, and feature implementation.
- Work spans frontend, backend, and mobile development depending on project requirements, collaborating closely with cross-functional teams to deliver scalable, high-quality solutions.
- Proactively identify opportunities to improve project architecture, optimize development processes, and keep dependencies up to date to reduce technical debt.
- Deliver scalable, high-quality solutions while maintaining strong development standards across the team.

Tech Stack: React 19, Angular 21, Node.js, .NET 10.

ITTI Digital **Asunción, Paraguay**
Mid-Level Software Engineer *August 2023–February 2025*

- Led the front-end team for the card product of the #1 bank in the country.
- Contributed to building a design system used by a development team of 100+ engineers to accelerate product delivery.
- Led the front-end development team for the card product (credit and debit), ensuring clean code throughout.
- Card product acquisition increased by over 60% since project inception, with transactions growing by over 70%.
- Built scalable APIs for the front-end team using Node.js with Express and Null Platform to improve CI/CD processes.

Tech Stack: Flutter, NodeJS, Express, Java and Git.

N.T.S. **Asunción, Paraguay**
Full Stack Developer *August 2022–August 2023*

- Developed Fundapp, a mobile application to register all livestock in the country, tracking vaccination status and export eligibility, using Flutter and Java with Spring Boot.
- Implemented the Fundapp dashboard to display geographic data, meat type, and animal status, using Angular, Java with Spring Boot, and PostgreSQL.
- Integrated Docker to optimize CI/CD pipelines, improving build efficiency and streamlining the deployment process.
- Built the SIVO application and its dashboard — used after animal processing — using Flutter, Java with Spring Boot, Angular, and PostgreSQL.

- Applied clean architecture principles across all applications to ensure scalable and maintainable code.
- Implemented Python microservices to handle the large user base of both applications.

Tech Stack: Flutter, Angular, HTML, CSS, Python, Java Spring Boot, PostgreSQL, Oracle and Docker.

MuTech S.R.L. **Asunción, Paraguay**
Full Stack Developer *May 2021–August 2022*

- Redesigned the entire Vaquita application, migrating from Ionic/Angular to Flutter, improving performance by 80%.
- Designed and implemented Vaquita, a fintech e-wallet application with 100k+ users, using Flutter and Node.js with NestJS.
- Designed the Vaquita website for greater product visibility using ReactJS and Node.js with NestJS.
- Integrated multiple third-party systems into the Vaquita app, increasing revenue by over 25%.
- Significantly improved backend queries, reducing average query time by 40%.

Tech Stack: Ionic, Angular, Flutter, ReactJS, NestJS and PostgreSQL.

PROJECTS

Ueno Bank: Full-featured mobile banking application for the #1 bank in the country. Enables clients to manage card payments, check transactions, pay bills, and manage loans from their mobile device. **Tech Stack:** Flutter, NodeJS, ExpressJS.
Fundapp: Mobile app to register livestock vaccinations nationwide. Stores geographic data, animal type, and health status to determine export eligibility. Used by government agencies. **Tech Stack:** Flutter, Angular +14, Java Spring Boot, PostgreSQL, Docker.
Vaquita: Fintech e-wallet app with 100k+ users. Allows users to manage money, review transactions, and make bill payments. **Tech Stack:** Flutter, Angular +12, NodeJS, NestJS, PostgreSQL.
Pneumonia Detection (Thesis): Mobile application that allows doctors to scan chest X-rays and detect pneumonia using AI. A Flask backend processes imaging data through a CNN model and returns results to the frontend. **Tech Stack:** Flutter, Angular +14, Python Flask, PostgreSQL, CNN AI.

EDUCATION

UNIVERSIDAD AMERICANA **Asunción, Paraguay**
B.S. in Computer Engineering *Mayo 2019-Sept 2024*
Honors: High GPA

ADDITIONAL SKILLS

Programming Languages: Advanced: Dart, Javascript/Typescript, SQL; Intermediate: Python, PHP, CSS. Basic: C#.

Framework Dev Tools: Advanced: Flutter, React, Angular (12 to 17), Spring Boot; Intermediate: NestJS, Flask, Express; Basic: .NET.

Databases: PostgreSQL, MySQL, Oracle, MongoDB and Redis.
